wanderminds

exploration reimagined, one adventure at a time.

travel should feel exciting and effortless...

…but travel can often feel like a chore

before travel

endless tabs and planning stress

generic, cookie-cutter recommendations

during travel

mechanical sightseeing and decision burnout

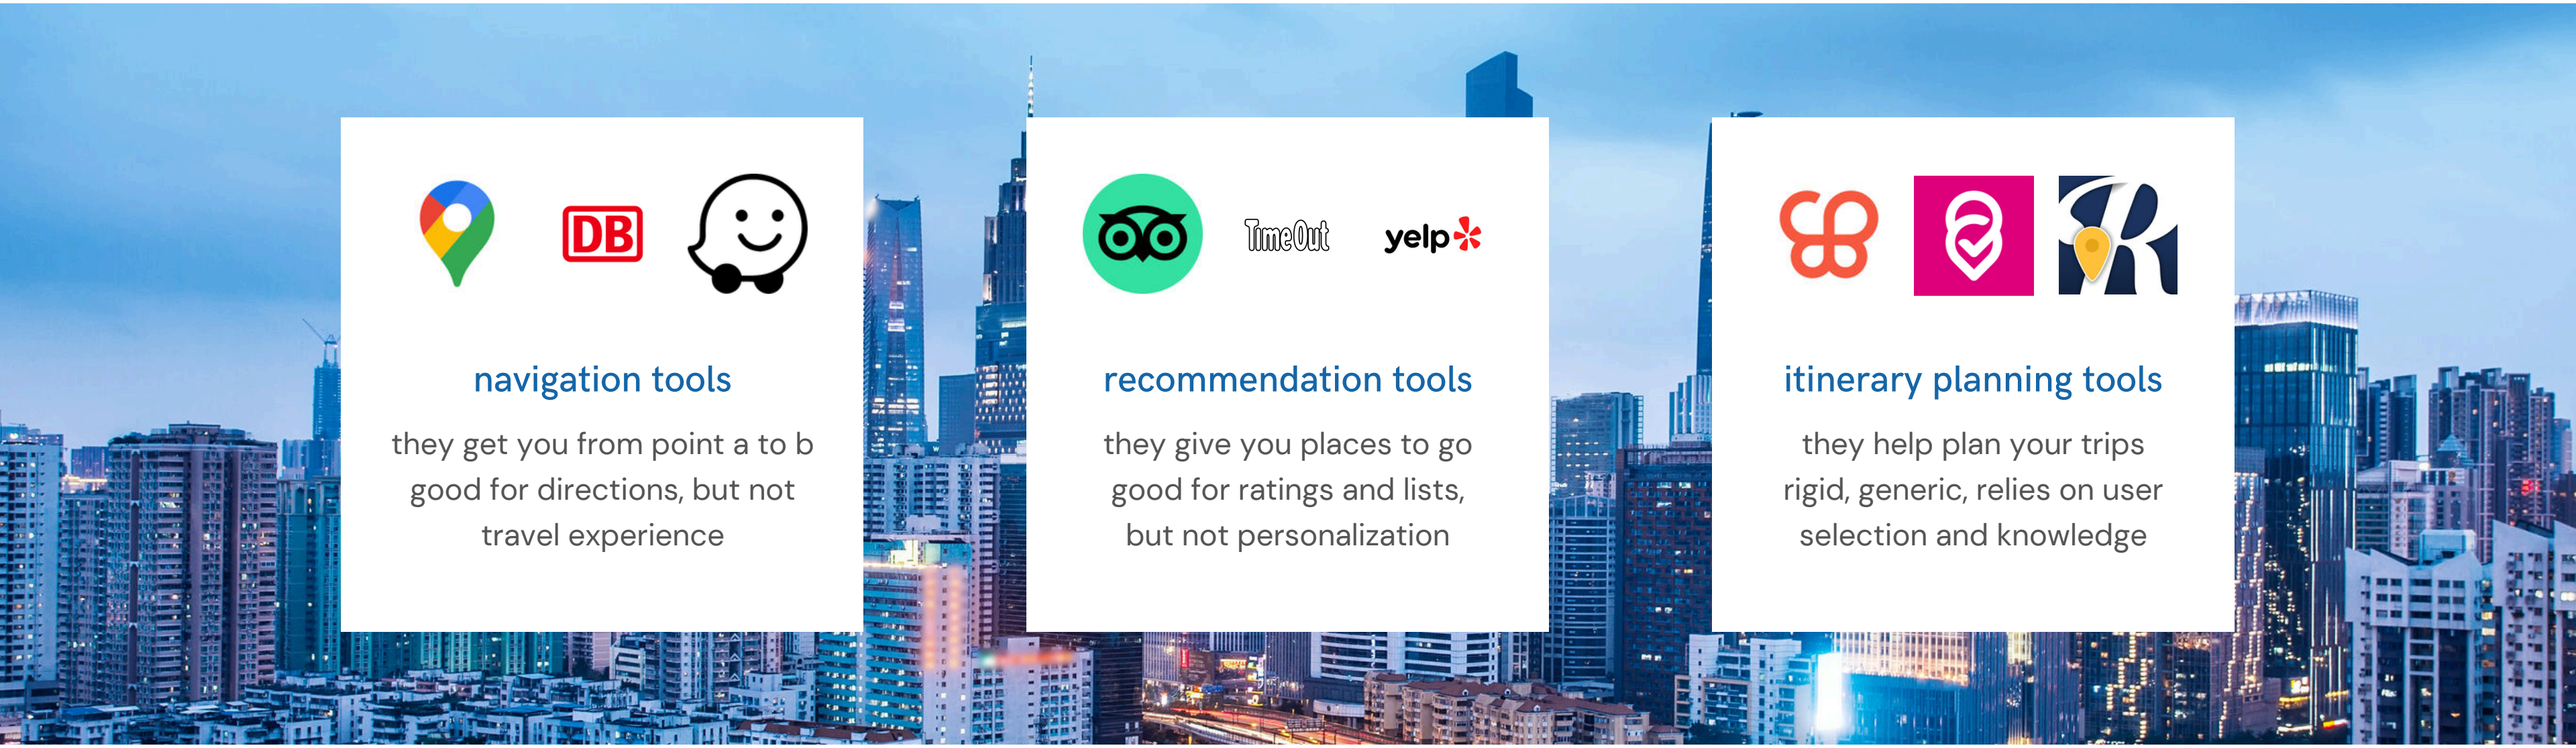

feeling rushed or lost

after travel

poor planning leading to dissatisfaction

regret over missed experiences

today’s travel tools are fragmented.

navigation tools

they get you from point a to b
good for directions, but not
travel experience

recommendation tools

they give you places to go
good for ratings and lists,
but not personalization

itinerary planning tools

they help plan your trips
rigid, generic, relies on user
selection and knowledge

more apps, more work, less travel.

the result?

overwhelmed.

“where do i start?”
“how do i maximize my time?

disconnected.

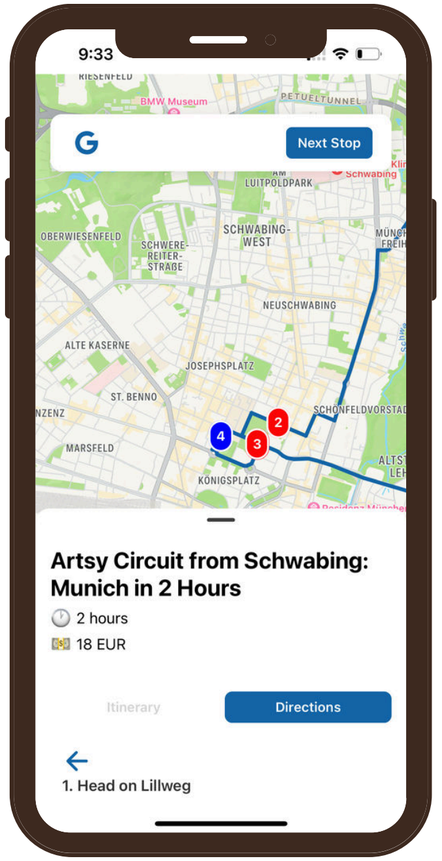

“it just feels like i’m moving from place to place”

bored.

“everything feels the same”
“nothing is exciting”

travelling doesn’t need to be like that.

introducing **wanderminds...**

wanderminds is an ai-powered travel assistant that recommends, guides, and immerses you in your travels — all in real time.

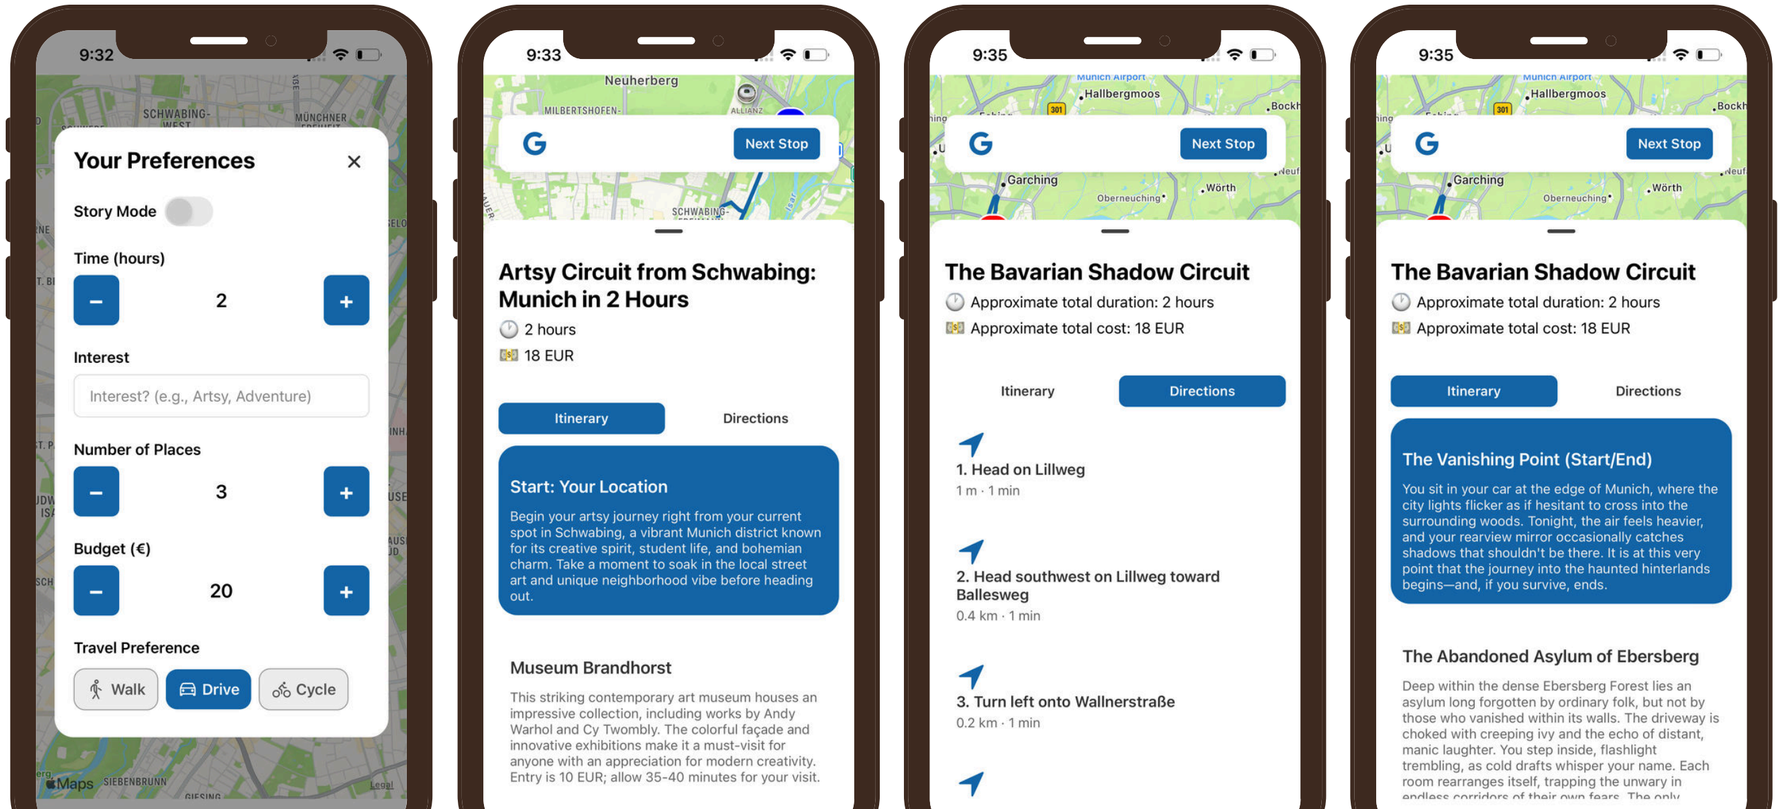

… and all of its benefits!

personalized travel, at your fingertips

seamless, real time tours

stress-free exploration

immersive and fun experiences

one app, two modes

explore

ai itinerary planner and guide

- curated trips, tailored to your time, budget, mood, and ride
- real-time recommendations and turn-by-turn directions — zero guesswork
- location-based, ai-curated guided tours— in your pocket, through text or voice, wherever you go.

story

augmented reality, fictional adventure

- pick your genre, duration and place — ai spins a location-based story as you explore
- craft your own journey with natural language prompts — you set the stage
- turn every walk, ride, or commute into an adventure — no more boring trips
